DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-11, drawn to a method of forming an interconnect line in an integrated circuit, classified in class 438, subclass 15+.
 - II. Claims 12-20, drawn to an integrated circuit, classified in class 257, subclass 750.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case instead of depositing a capping layer overlying the sacrificial layer prior to forming an opening in the sacrificial layer, you could deposit the capping layer overlying the sacrificial layer after an opening is formed in the sacrificial layer.
